

Immune Balancing Complex™

Serving Size 2
Servings Per Container 45

Amount Per Serving

Vitamin A (palmitate, beta carotene, alpha carotene)	6700 IU
Vitamin C (ascorbic acid)	240 mg
Zinc (monomethionine)	9 mg
Selenium (aspartate)	22 mcg
Copper (sebacate)	0.9 mg
Manganese (aspartate)	9 mg
Thymus (abgland)	200 mg
Hesperidin	100 mg
Astragalus Extract	100 mg
N-Acetyl L-Cysteine	60 mg
Lymph	50 mg
Spleen	50 mg
Bone Marrow	50 mg
Bromelain	50 mg
Rice Bran	30 mg
Hypothalamus	30 mg
Pituitary (Anterior, Whole)	45 mg
Pineal Gland	150 mcg

SUGGESTED DOSE: As a dietary supplement, take 2 capsules, three times per day, or as directed by a healthcare professional.

IMMUNE BALANCING COMPLEX™

A COMPREHENSIVE BLEND OF VITAMINS, MINERALS, AND GLANDULAR CONCENTRATES TO SUPPORT IMMUNE SYSTEM FUNCTIONS.

- Stress modulation
- Nutritional support for proper immune function
- Supports healthy response to infections and inflammation

When you want a generalized immune balancing formula for your patient, Immune Balancing Complex™ is a truly complete product for immune support. It is formulated with ingredients that act synergistically to create a well-balanced immune response. The longer you use Immune Balancing Complex™, the better it works. These nutrients act as nutritional support, not as substitution or replacement therapy. Botanicals that have shown a tendency to develop immune system resistance to their supportive properties, such as Echinacea, have purposefully been left out. Immune Balancing Complex™ can be taken daily for long periods of time without concern of a blunted or decreased immune response.

IMMUNE BALANCING COMPLEX™ is designed to help balance the immune response. Therefore, it can safely be used in inflammatory conditions and by allergy patients. Balanced T Helper 1/T Helper 2 activity is key to a healthy immune system. Immune Balancing Complex™ is designed to move the immune system towards that balance.

GLANDULARS have been shown, in recent studies, to release their “actives” into the system in an “inactive form.” These inactive hormones, peptides, etc. are then activated by specific enzymes. For years it was thought that our digestive systems would digest and destroy glandular proteins, peptides, enzymes, hormones, etc. This has been shown to be partially false.

OUR DIGESTIVE ENZYMES actually assist in activating these glandular “actives” and a small percentage of these are absorbed intact, allowing our bodies to gain benefit from them. A few examples of enzyme activation would be pepsinogen to pepsin, cortisol to free cortisol, DHEA to free DHEA, thyroxin to free thyroxin. It is the “free”

IMMUNE BALANCING COMPLEX™

forms that are biologically active. When we take glandulars orally, (e.g. Immune Balancing Complex™ and prescription thyroid glandulars, such as Armour Thyroid) our digestive system, serum enzymes, and intracellular enzymes act to create “free” or “biologically active” forms of the glandulars’ constituents (hormones, peptides, etc.). Glandulars can have dramatic and profound benefits in fine-tuning our body’s response. Immune Balancing Complex™ provides specific glandulars from freeze dried (lyophilized) clean sources. No salt or solvents (azeotropic processing) are used. Freeze-dried glands are important because unlike other means of processing, vital hormones, enzymes, peptides, fatty acids, etc. are protected. Freeze-dried glandulars generally have the highest level of active ingredients.

ANTIOXIDANTS/ACCESSORY NUTRIENTS ARE INCLUDED IN IMMUNE BALANCING COMPLEX™ TO ENHANCE THE IMMUNE SYSTEM.

VITAMIN A, NATURAL MIXED CAROTENES, VITAMIN C, ZINC, COPPER, MANGANESE, SELENIUM all aid in a healthy immune response. In addition to the above vitamins and minerals Immune Balancing Complex™ contains plant flavonoids and adaptogens that may help to strengthen our immune resistance.

QUERCITIN AND HESPERIDIN reduce inflammatory reactions by stabilizing mast cell membranes, thus reducing release of inflammatory mediators.

RICE BRAN provides a source of Beta sitosterol and Beta sitosterol glucoside (sterol/sterolins). These sterols and sterolins have been shown to bind to T Helper cell receptor sites, balancing their function. This balancing effect helps moderate B cell activity.

ASTRAGALUS has a long history of acting as an adaptogen, strengthening our bodies’ resistance to stress. Astragalus has also been shown to enhance T cell function.

BROMELAIN acts as a proteolytic enzyme, reducing inflammation, digesting histamine and other inflammatory mediators, and enhancing the absorption of other ingredients in Immune Balancing Complex™ (e.g. quercitin and hesperidin).
